recent experience

03/2025 -
present

Goldman Sachs Private Wealth Management Consultant (InRhythm) | Lead UX Designer

- Building, documenting, and managing PWM design systems for web and iOS.
- Creating complex PWM-specific components from firm-wide design system atoms, for use by full team of PWM/Wealth designers.
- Re-skinning existing flows in the firm's new brand while advocating for design improvements.
- Conducting visual quality assurance: reviewing builds in QA environment and communicating visual errors or discrepancies to developers.

07/2024 -
03/2025

Goldman Sachs Marquee Consultant (InRhythm) | Lead UX Designer

- Co-led implementation of new brand across all Marquee products.
- Created and managed Marquee-specific design library of reusable, flexible Figma components to be used by designers Marquee-wide.
- Audited existing applications as part of the new brand application: identified inconsistencies and proposed enhancements alongside the branding lift & shift.
- Worked closely with developers, product managers, Marquee designers, and the core design team.

10/2022 -
06/2024

Wayfair Consultant (InRhythm) | Senior UX Designer

- Designed new features and enhanced existing features across the Post Purchase Experience, including customer-facing, third party manufacturer-facing, and internal tools.
- Led end-to-end design and build of the Customer Messaging Portal, a new platform for customers to communicate directly with manufacturers, as part of the company's Supplier Transfer Program.
- Planned and facilitated live focus groups with customer service agents and representatives from suppliers to understand pain points and validate proposed designs.
- Collaborated with product managers, developers, and other stakeholders on initiatives to make customer service workflows more efficient and intuitive.
